## REPORT OF THE SUBCOMMITTEE UNDER H. R. 26

*To the Honorable Paul Powell, Speaker, and Members of the House of Representatives of the Seventy-first General Assembly:*

I beg leave to report that, pursuant to House Resolution 26, a subcommittee of the Committee on Roads and Bridges was appointed and it completed its final report.

Since five of the recommended bills are pending in the House, the report is transmitted to the House, to be printed in the Journal for the information of the members who soon will consider said bills.

Respectfully submitted,

JOSEPH P. STREMLAU

Joseph P. Stremiau, Chairman

Committee on Roads and Bridges

## FINAL REPORT OF THE SUBCOMMITTEE PURSUANT TO H. R. 26

## INTRODUCTION

House Resolution 26 created a subcommittee of the Roads and Bridges Committee to confer with the officials of the Department of Public Works and Buildings relative to the activities and policies and financial transactions of the Department, to ascertain the effect of the program for the National System of Interstate Highways and obtain such information as is necessary to evaluate and formulate a legislative program.

At the first meeting, Representative Paul Graham was elected Secretary. He has kept complete minutes of each meeting and what transpired at the subsequent meetings was reported by a court reporter and the proceedings have been transcribed.

On April 8, 1959, the members met with R. R. Bartelsmeyer, Chief Highway Engineer, Theodore F. Morf, Engineer of Research and Planning, John A. Shaneman, Engineer of Planning and Programming, and John T. Garretson of the Bureau of Administrative Services. At this meeting fifteen questions were orally propounded concerning the highway problems and the Department was given two weeks for a reply. The questions and answers were published in book form by the Department. A copy of this publication and all of the minutes are filed with the Clerk as a part of this report.

The subcommittee was authorized to engage a Staff Assistant to digest this publication and collect the necessary information to make a fairly comprehensive report. He was also specifically instructed to check into the transactions which lay behind the contracts under which the Department of Public Works and Buildings paid to the Toll Commission the sum of \$5,934,350 for right-of-way and construction costs. These contracts were made during the year of 1958. He also checked the use of the priority ratings and the programming of the highway improvements. He conferred with the officials of the Division of Highways, Mr. Monnier of the Bureau of Public Roads, and Donald M. Phares, of the Illinois Toll Highway Commission. He was engaged on April 28 and completed his research on Thursday, May 7, 1959. That evening the Committee met with him for his oral report and adopted some recommendations for legislation.

The final hearing was held on May 11, 1959, at which time Richard Quinn, Assistant Attorney General, L. A. Murphy, Right-of-Way Engineer, E. L. Shcrtetz, Chief of the Bureau of Design, E. A. Rosenstone, Director, and Ralph R. Bartelsmeyer, Chief Highway Engineer, testified.

As the result of the work of the committee, specific legislative recommendations are made and some justifiable criticism of the Division of Highways is warranted.

First, we will state the summaries and then anyone who is interested can find our reasons therefor in the material which will follow.

Before turning to these, however, we make special note of the fact that we had the full and complete cooperation of all of the officials and we are particularly indebted to Mr. Bartelsmeyer, Mr. Morf and Mr. Shaneman for their efforts to aid the committee in arriving at its conclusions. Furthermore, the committee observed no fraud or corruption in the Highway Department.

At the last hearing, Mr. Bartelsmeyer requested that it be brought to the attention of the people and the legislature that unless Congress acted to appropriate the money for the apportionment of \$127,000,000 for the 1961 fiscal year the Department would have to suspend construction. The Federal Highway Trust Fund is fast being depleted and it may be necessary for Congress to resort to general revenue. The Trust Fund is so short that the Bureau of Public Roads says that it cannot promise the states any money for construction of the National System of Interstate Highways for that year and, consequently, the President has asked Congress to increase the Federal Gas Tax a cent and a half a gallon.

## I

### SUMMARY OF LEGISLATION RECOMMENDED

1. The annual report from the Division of Highways should be made on a fiscal year basis instead of a calendar year or as an alternative the appropriation shall detail the proposed use of funds appropriated by districts listing major projects within the district, estimated maintenance, and a large sum for contingencies.

2. The position of the Director is incompatible with his position as an ex officio member of the Toll Commission. He is in the position of contracting with himself for the benefit of the bondholders of the Toll Commission. He should not be a member of the Commission.

3. Except where freeways coincide with the National System of Interstate Defense Highways, the Freeway Act should be amended so that either a highway cannot be declared a freeway until the Division of Highways is ready to acquire the right-of-way or the declaration is vacated if the right-of-way and access rights are acquired therefor within three years after the declaration.

4. Paragraph 4-302 of Senate Bill 4 should be amended so that the published highway program would be on a biennial basis to be published on or before May 1st in 1961 for the ensuing biennium and every two years thereafter, or in the alternative the appropriation shall detail the proposed use of funds appropriated by districts listing major projects within the district, estimated maintenance and a large sum for contingencies.

5. The Plat Act should be amended so that land cannot be subdivided outside of municipal limits with lots which would have direct access on a State highway.

6. Repeal paragraphs 52(a), (b) and (c) of Chapter 127, Illinois Revised Statutes 1957.

7. The amount to be expended for consulting engineers should be set up in the appropriation by itself as a separate heading.

8. Reappropriations should be made only on the basis of the projects obligated therefor.

9. Instead of being merged with others, the Division of Highways should be a separate department by itself.

To implement these recommendations, we have had six bills prepared by the Legislative Reference Bureau and we recommend that the Roads and Bridges Committee report these bills to the House with a recommendation "Do Pass." The titles of these recommended bills are as follows:

A bill for an Act to amend Section 8-101 of the "Illinois Highway Code", enacted by the Seventy-first General Assembly;

A bill for an Act to amend Section 25 of "The Civil Administrative Code of Illinois", approved March 17, 1917, as amended;

A bill for an Act to amend Section 3 of "An Act in relation to the construction, operation, regulation and maintenance of a system of toll highways and to create The Illinois State Toll Highway Commission, and to define its powers and duties, and to repeal an Act therein named", approved July 13, 1953, as amended;

A bill for an Act to amend Section 4-302 of the "Illinois Highway Code", enacted by the Seventy-first General Assembly;

A bill for an Act to repeal "An Act in relation to the acquisition of raw materials and manufactured products entering into public improvements of the State and defining the powers of the Department of Public Works and Buildings with reference thereto", approved June 30, 1919;

A bill for an Act to add Section 4-215 to the "Illinois Highway Code", enacted by the Seventy-first General Assembly.

### RECOMMENDATIONS NOT REQUIRING LEGISLATION

Since the Federal Highway Act of 1956, the money available for the construction of highways has increased at a stupendous rate. The budget calls for new appropriations for highway construction of \$538,445,600 and we will be asked to reappropriate \$187,000,000, for a grand total of \$725,445,600.

This expanded program is a challenging assignment and strain on every facility available. The Department keeps monthly accounts of these appropriations, the vouchers issued and the unencumbered balance. Furthermore, there are countless major decisions of policy in connection with the standards the Legislature has laid down. Also, it seems to us that there will be many maintenance questions between the Toll Commission and the Department.

To aid the Department and to assure the public of progress and impartial decisions, we believe that the Board of Highway Advisors should be reactivated. Section 50, Chapter 127, Illinois Revised Statutes of 1957 provides for the appointment of a Board of Highway Advisors. The Legislative Reference Bureau advises us that these Advisors would be appointed by the Governor for a period of two years and the appointments would have to be confirmed by the Senate. During the early highway program in the 1920's, the Board of Highway Advisors rendered the State a great service, but the Board has been inactive for many years.

With the accelerated program, it seems to us that the public interests would be served if a group of advisors, specially skilled in these fields, were reactivated. They could review the monthly progress made by the Department and avoid any diversion of the road funds. Such a group, meeting once a month, but serving without compensation, could act as a watchdog over the activities and the financial commitments of the Department. The Commission to study the State Government made this same recommendation in 1950 and the need of such a Board of Highway Advisors is far more acute now than it was then.

In answer to the fifteen questions, the Toll Road Commission had written to Roger E. Henn, Executive Director of the Legislative Audit Commission that the Department had paid out of the road fund \$5,934,350 for reimbursement for right-of-way and construction done by the Toll Highway Commission. The vouchers which have cleared the office of the Director of Finance indicate that the actual payments

have exceeded this and the total is \$6,449,815. The dates, voucher numbers and amounts are as follows:

DATE	VOUCHER NUMBER	AMOUNT
3/18/58	CR 6446	\$4,660,880.
3/21/58	CR 6549	264,590.
3/21/58	CR 6550	119,130.
4/ 1/58	CR 6781	237,840.
4/ 7/58	CR 6879	273,840.
5/ 1/58	CR 7763	339,230.
5/14/58	CR 8178	38,840.
10/ 2/58	CR 14159	25,870.
12/18/58	CR 17924	155,288.
1/20/59	CR 18944	7,330.
1/23/59	CR 19159	3,148.
2/17/59	CR 19945	223,829.
Total -----		\$6,499,815.

It is significant to note that this figure exceeds the amount set forth in the reply to the fifteen questions by \$15,465 and that substantial payments were made in the months of December 1958 and January and February of 1959. They, apparently, ceased soon after the Resolution was introduced creating the sub-committee under H. R. 26. It is our recommendation that payments such as this should be made only from appropriations therefor.

Furthermore, doubt is cast on the validity of this agreement because in Item 15 the state has made a substantial payment of \$162,420 for a grade separation under SBI 21 (Route 21) when we know that said Route 21 and the Toll Road do not cross or intersect in Lake County. When questioned about this, Mr. Bartelsmeyer offered to furnish an explanation of this item, but none has been furnished to date.

While new concrete slabs were laid on the bridges at the intersections, apparently no consideration has been given to the damage the contractor did to the state highway adjacent to the construction area.

We are cognizant of the fact that there is a growing resentment in the Legislature about a line item in the Appropriation Bill, as follows:

#### HIGHWAY CONSTRUCTION—\$725,445,600.

This, for practical purposes, amounts to unlimited authority to the Department to construct highways wherever some bureaucrat in Washington would agree to spend some Federal funds. It appears to be without limitation. It is our conclusion, in the short time the Staff Assistant had to work, that it is almost impossible to correlate or check the Annual Program (on a calendar year basis) with the Service Bulletins arranged by counties and the Annual Report which is issued long after the calendar year has expired for which the report is made. Generally speaking, a session of the Legislature has intervened.

At one of the hearings, Mr. Bartelsmeyer stated to us that considerable time and money could be saved by publishing the Annual Report on a fiscal year basis. On May 11, 1959, he reversed his position and made the points that reports on the fiscal year basis would not save money, the statistics would be less meaningful and the extra effort would come at the wrong time. In his letter submitted May 11, 1959, he states that the minimum schedule for the Annual Report is at least thirteen months. Here, possibly, we should benefit from the format of the quarterly reports of the Illinois State Toll Highway Commission which issues quarterly progress reports. Consequently, the format of the Annual (and we hope it will be biennial)

Program, the Service Bulletin and the Annual Reports will be uniform and by districts like the Annual Program. Our recommendation is fortified by Section 2 of the Act in relation to State Finance, Illinois Revised Statutes 1957, Chapter 128, paragraph 138, which reads as follows:

"Whenever the constitution or any statute, in term or effect, requires a report or account to be made or rendered by any officer, department, institution, board or commission for a year, such report or account, so far as it relates to receipts and disbursements of money, shall be for the preceding fiscal year, unless the calendar year be expressly mentioned."

### III

#### SUMMARY OF CRITICISMS

1. The annual reports of the Division of Highways are and long have been two years behind. The last one available is for the calendar year of 1956.

2. While operating on a fiscal year basis, the reports on the calendar year basis do not provide an accurate measurement of progress which can be compared with the appropriations.

3. Murphy, Turnbull and Jones, CPA's who audited the Division to June 30, 1958, report that the activities and responsibilities of the Division have far outgrown its fiscal accounting methods and facilities. There is poor control over retaining copies of vouchers and little coordination between the various subdivisions of the accounting activity.

4. While there were some legitimate items in the contracts to pay the Toll Commission for right-of-way and construction, most appear to have been negotiated to reach a sum of \$7,000,000.00. The committee found that no Federal reimbursement has been requested for any part of the \$6,499,815 paid to the Toll Commission.

5. Federal reimbursement is not sought for right-of-way on the primary system nor for Staff Preliminary Engineering. While this is defended on the ground that all of the Federal funds are utilized for construction, this seems to be a shortsighted policy which will eventually leave Illinois short of matching funds.

6. While the Act of the Legislature in 1957 required the Department to use existing highways where possible in the location of the National System of Interstate Highways, most of the interstate system is being built on new alignment. The old primary roads will remain to be maintained in addition to the new system. In 1958, the State was maintaining 14,452 miles of pavement at a cost of \$27,984,-062.12. This maintenance and operation, excluding city and expressway maintenance, was \$1,874.34 a mile. This is set forth in Table I on Page 13-3 of the *Reply* and, compared to the annual maintenance and operation for expressways in 1958 Illinois maintained 52.11 miles at a total cost per mile of maintenance and operation of \$19,066.86. While it can be understood that this meager mileage may not be a fair test, it is foreseeable that the cost of maintenance and operation for the 1612 miles of Interstate System could run as high as \$30,000,000 annually, or a sum about equivalent to the maintenance costs of all of the other highways. This added burden indicates to us that the present primary system should be integrated as service roads, if possible.

7. Many projects in each district have been on the annual program three years or more. The principal reasons given are the delay in right-of-way acquisition or the preparation of construction plans by consulting engineers. There should be closer coordination between the programming and the design.

8. The 1958 program was checked by the Department for awards. In one district, only 23% of the primary work programmed was placed under contract. It is as unreliable in regard to interstate work as it is to primary system improvements.

## THE DETAILS TO SUPPORT THE ABOVE

In order to deal with the mass of information supplied in the publication entitled "Answers to the Fifteen Questions," it is necessary to leave the original questions behind and set up new classifications. These are as follows:

1. The dealings of the highway department and the Toll Road Commission.
2. The use and effect of Federal-Aid in Illinois.
3. The Highway Program and priority planning.
4. The use of private consultants in the preliminary design engineering of highways.
5. Certain aspects of the construction data, Bureau of Right-of-Way Acquisition and Bureau of Administrative Services.

## 1.

THE DEALINGS OF THE  
HIGHWAY DEPARTMENT AND THE TOLL ROAD  
COMMISSION.

On February 21, 1958, the Department of Public Works and Buildings agreed to pay the Illinois State Toll Highway Commission more than \$5,934,350 for improvements at points where toll roads intersected the primary highway system. It was agreed that the Toll Commission "*shall purchase right-of-way and perform the construction as indicated.*" There were twenty-five intersections covered by the agreement. In all cases, the wording of the agreement referred to work to be performed *after* the date of the agreement.

These excerpts from the Toll Highway Act and the Bond Resolution of the Toll Highway Commission should be kept in mind throughout this discussion:

Chapter 121, Par. 314A (f): The word "cost" as applied to a toll highway shall embrace the cost of construction, including bridges over and under existing highways and railroads, the cost of acquisition of all land, rights of way . . . the cost of diverting highways, interchange of highways . . .

Chapter 121, Par. 314A 45.1: After the issuance of revenue bonds to finance the construction of a toll highway . . . the expenses of the Commission and the compensation of the members thereof, and all other costs of said toll highway . . . shall be paid from the proceeds of such bond issue or from the monies received by the Commission as tolls or otherwise in the operation of said toll highway.

Sec. 6.03 of Bond Resolution: Items of Cost. For the purposes of this Resolution the cost of the facility shall include the cost of all bridges, tunnels, overpasses, underpasses, interchanges, entrance plazas, approaches and connecting highways, etc.

A contract for reimbursement appears unnecessary when the language of the statute and resolution are read. The contracts called for pavements to be provided and for improvements extending certain distances from the centerline of the toll road. To report on the policy behind these agreements, the staff secretary asked to see the requests for the work referred to in the contract. He was informed that written requests were not available, that in most cases the requests were made at conferences of the Division of Highways engineers and Toll Commission engineers. The secretary was provided with files containing correspondence between the Division of Highways and the Toll Commission which did not reflect any prior requests concerning most of the intersections named in the February 21st agreement. In these files there were memoranda of many meetings including some in which other intersections were discussed and negotiated in detail. The file entitled General Inter-

section Agreements indicates that negotiations on most of the twenty-five commenced in January, 1958. A memorandum to the files initialed by Mr. Bartelsmeyer states that on January 5, 1958, "We were advised to re-work our agreements with the Toll Highway Commission concerning joint construction and right-of-way acquisition work whereby the Division of Highways would assume additional obligations at these points of joint endeavor in the amount of \$7,000,000. The memorandum recites facts about a meeting of January 17, 1958, with Toll officials and states that further meetings will be necessary "to prepare a complete list of joint construction and right-of-way acquisition work which will reflect the \$7,000,000 expense item to the Division of Highways." When questioned about this memoranda, Mr. Bartelsmeyer did not make clear who had advised reworking the contracts. Testimony did not reveal where the instructions came from. Mr. Rosenstone said his engineers had advise the negotiations.

Another thing about the intersection agreements is that prior to the coming of the toll road, the state had easements for *most* of their right-of-way at these intersections; in every case of an interchange or intersection there is an additional charge to the state for right-of-way in fee.

At many of the intersections the state highway was four lane before the toll road came along. At some, it was two lane and the Toll Commission did not improve it to four lane. The Toll Commission could not take these roads over their expressways in a big hump or leave a bad curve in the road—they were obliged to build a new roadway—a safe road with suitable approaches, or build over the existing state highway. In most cases, the Commission carried the State road over the toll highway. When a new bridge is built, new pavement must be provided. The whole improvement must be safe. The best pavements must be provided. There must be a sufficient number of lanes to handle former and expected traffic. To look ahead to traffic in 1975 is practical at best. Why should Illinois be required to build an additional bridge at a later date? At those intersections where there is no interchange it is at best reasonable that the State require a bridge to be built that will handle future traffic. Correspondence and files show that this was the view of the Department before they received the "advice" referred to in Mr. Bartelsmeyer's note to the files of January 17, 1958.

There are other agreements in negotiation with the Toll Commission. These should be carefully watched, preferably by a group such as the Board of Highway Advisors, if it can be reactivated.

Because of the conflict of interest, we also recommend that the Director of Public Works and Buildings be removed from the Toll Commission. These two bodies should be dealing with each other at arm's length. They should not have an interlocking directorate. Mr. Rosenstone testified he attended only to make a quorum and even then represented only the Department.

## 2.

### THE USE AND EFFECT OF FEDERAL-AID IN ILLINOIS

Illinois now claims reimbursement from the Federal Government for improving or constructing certain roads. The money is paid after the work is done, on a progress and completion basis. There are four classes of roads which qualify for these funds:

1. Federal Aid Interstate: These are expressways; if the State complies with government regulations, 90% of Illinois' expense, including construction, right-of-way acquisition, engineering and highway planning will be paid by the Federal Government. There are over 1600 miles of such highways planned or under construction here; the Federal Government plans to reimburse Illinois 90% of the total cost of these roads.

2. Federal Aid Primary: These roads were the major concern of the Federal Government before they decided to finance the interstate program. The United States continues to finance construction and improvement of these roads. If you are driving on a major highway, the chances are that it is a Federal Aid Primary road—according to the Bureau of Public Roads of the United States, less than 50 miles of interstate highway have been completed (other than toll roads). If Illinois does not exceed the Federal quota, the United States pays 50% of the cost of these roads.

3. Federal Aid Urban: Funds have been available to provide 50% of the cost of primary highways in cities.

4. Federal Aid Secondary: These are often the blacktop that leads to the road with a State or U. S. route number. They are eligible for 50% Federal Aid. In many cases the local funds are provided by the county or district in charge of the roads. According to the Highway Department, the other 50% required to construct and improve these roads is most often provided by the local government in charge of the roads.

To qualify for Federal reimbursement, the section of highway improvement must be programmed with the United States Bureau of Public Roads. They maintain a full time office in Springfield. If the proposed improvement meets with requirements the State goes ahead with construction engineering and right-of-way acquisition. As each of these phases reaches a point of achievement, claims are made to the Federal Government for their proportion of the expenses. These are promptly paid on a completion basis; the State must wait until complete approval for their last claim which is often near 10% of the total amount collected.

Federal funds are made available on a fiscal year basis, some may be obligated in advance of collection; generally, there is a period of three years in which to use the funds before they lapse.

The officials of the Division of Highways assert that Illinois has not lost any of the Federal funds made available by allowing them to lapse.

The 1956 Act brought an innovation by providing that Federal Interstate funds were to be allocated among the States in proportion to the cost of completing the Interstate system in each State. One of the factors which bear on the cost of completing the Interstate system is the extent to which designated highways have already been financed from toll road funds. In Illinois this had the effect of reducing the reported needs from \$2,265,573,000 to \$1,917,662,000. The effect of this was that Illinois received a smaller proportional part of the Nation-wide appropriation than it would have, had the cost of roads supported by toll financing been included. Since the gross cost (including toll financing) exceeds the net cost (without toll financing) by about 12 per cent, this may be regarded as the amount by which toll financing reduced the proportion of the Nation-wide allotment which Illinois currently receives.

As of the end of March, 1959, Illinois had obligated 14% of its 1960 Federal Interstate Highway apportionment which was to become available after July 1st, 1959. The term "obligation" does not mean that the Department had to let a contract. Federal-Aid Interstate funds become obligated when the Division of Highways and the United States Bureau of Public Roads agree that a certain project is to be commenced and completed. Another way of describing this practice is as advance planning.

At only one place was it clear Illinois was not collecting Federal funds to which they were entitled. Construction work requires that preliminary design engineering be completed prior to the actual construction. The Federal Government permits claims to be made for this preliminary engineering either on an actual cost basis or on a percentage basis of the estimate of construction costs. Illinois is unable to

claim preliminary engineering expenses where the work is performed by Division of Highway engineers because insufficient records of time spent on certain projects have not been kept. There has been correspondence between the Division and the Bureau of Public Roads on this subject for several years.

The Bureau of Public Roads has provided the State with the type of form which the engineers would be required to fill out, giving the necessary information, but so far these records have not been kept and the absence of recent correspondence in this file indicates that the Department plans to take no action to correct the situation. Failure to make claims and to keep the records which would support the claims for reimbursement should be corrected promptly.

Illinois is entitled to receive reimbursement for right-of-way purchases on the Federal Primary system. On page 9-2 of the *Reply* it is stated that Illinois has received \$10,229,548 reimbursement for right-of-way acquired. A table showing Federal Aid collected prepared at the request of the committee showing all Federal Aid collected lists nothing collected under this heading.

There is no reason why large right-of-way acquisitions should not be programmed for reimbursement. It is not unusual to find that right-of-way cost more than programmed construction.

### 3.

#### THE HIGHWAY PROGRAM AND PRIORITY PLANNING

Each year, pursuant to statute, the Division of Highways publishes an Annual Program for the purpose of informing the public of the planned improvements on the Primary Highway system. One of the original fifteen questions asked for an explanation of why certain projects had remained on the annual program for three years. The reply to the question listed 56 items which had been on the program for three years.

The reasons for delay can be broken down roughly into three categories: (1) lack of plans, (2) delay in right-of-way acquisition, and (3) negotiation delay. On projects involving urban improvements, there was often a municipal dispute which justifiably delayed the project.

Persons interested in the detailed explanations of why the projects were not completed are referred to the answers of the reply to the fifteen questions.

At the request of the committee, the Division of Highways marked a 1958 Annual Program showing those projects which were actually completed in the course of the year in Districts 1, 4, 7 and 9. The table on District 9 was prepared at the suggestion of the Division, which regarded District 9 as one of their districts in which most of the programmed work had been completed. The primary work completed in District 9 in 1958 is remarkable. Out of 24 projects listed, 17 were let. However, of 33 Federal Aid Interstate projects listed, only 13 were put under construction.

As we mentioned, District 9 represents a good record. It does when compared with District 1. Forty-three Interstate projects were programmed for construction in 1958 in District 1. Thirteen were put under contract. Of 69 Primary improvements programmed, 16 were put under contract in 1958.

This cannot be described as programming and certainly does not comply with the statute requiring the publishing of the program. Certainly, allowance must be made for emergencies and inability to perform the impossible. No such situation should exist in the large number of uncompleted projects. It is a fair conclusion that there is insufficient relation between the programming and design. Otherwise, the projects would be placed under contract in the biennium in which they are

programmed. We recommend that such projects only be programmed when the Department is prepared to proceed.

The program would be more effective and useful if it were issued on a biennial basis beginning on the 1st of May, 1961, for the ensuing biennium. This would then be published while the Legislature was in session and considering the biennial appropriations.

There is enough uncompleted work on the 1958 and 1959 program to carry the Department through to July 1, 1961.

The Bureau of Planning and Research in charge of programming is also in charge of assembling and publishing the Sufficiency Rating Report of the Primary Highway System. This publication lists all portions of the Primary Highway system in the State of Illinois and assigns to each a priority sequence dependent upon the condition of the highway, the traffic using it and other factors. The purpose of the priority rating is to determine which highway should be improved according to its need for improvement. Certain sections of highway are designated emergency sections under this system. The State describes a structural emergency condition as one requiring that immediate steps be taken to halt the accelerated destruction of the pavement. The charts prepared by the Department show that most emergency sections have been improved. Beyond this, the priority ratings have not been followed:

These priority sequences are now current and should be strictly followed as required by the law. Any deviation from the priority sequence should be explained by the Department in the program.

#### 4.

#### THE USE OF PRIVATE CONSULTING ENGINEERS by the DIVISION OF HIGHWAYS

At the present time nearly all of the preliminary design engineering for the Interstate System has been turned over to private consultants. Preliminary design engineering consists of the preparation of plans before construction is undertaken and bids are let. Federal reimbursement is available for the money spent on consulting engineers and it appears that most of the cost of engineering on the Interstate System has been reimbursed by the Federal Government. The table provided on Page 3-3B lists this item at \$14,374,000. At the present time these contracts for preliminary engineering are let without competitive bidding on the basis of a fee to equal 4 or 4½% of the total construction contract cost.

In one unusual case, a Non-Federal Aid Interstate project, a contract for preliminary engineering was awarded to the Chamlin Engineering Company on a "cost plus 100%" basis, with no limitation on the total amount of fee. Correspondence between officials of the Highway Department and the Finance Department indicated surprise on the part of the Department of Finance at such a contract; however, Finance was informed that such a contract was not unusual and that more of them could be expected. The Engineering Contract Ledger does not reveal any further contracts of this type. The Department's explanation for the use of consulting engineers, rather than staff engineers, is the inability to secure trained personnel. They state that the attractions of private firms are greater than the State can afford to offer. However, the State appears to have no difficulty in securing engineers for its resident "on the job" work for which the State claims Federal reimbursement.

If the State performed its own preliminary engineering and kept adequate records of the time and expense of each project, Federal reimbursement could be claimed for this work. As we indicated in the discussion of Federal Aid, this is one

field where the State has not been claiming reimbursement because of inadequate records. Through the Federal Interstate Program, Illinois has an opportunity to improve the staff of their Engineering Department from Federal funds. The only limitation on this reimbursement would be that the salaries be reasonable.

In a state as large as Illinois there are certain to arise problems in engineering requiring the use of professional private assistance. A complicated bridge across a wide river is an example of this type of work.

For preliminary design work on highways, the Division of Highways pays at the same rate as the complicated bridge work: 4% - 4½%. The highway design work is done in accordance with rules laid down by the Bureau of Public Roads. Each interchange must conform to certain standards: the clearance must be the same, the pavement so thick and almost as constant is the fee of the engineer. For such standard work, the engineering staff in the Department should be adequate. It should be kept in mind that 1600 miles of interstate highways must be built according to the set standards. From this, it would seem logical that consultants should be used for extraordinary work, but for the standard design the Bureau of Design should be developed to handle it.

## 5.

### CONCERNING THE BUREAU OF CONSTRUCTION, BUREAU OF RIGHT-OF-WAY ACQUISITION AND BUREAU OF ADMINISTRATIVE SERVICES

In addition to the supervision of actual construction, the Bureau of Construction is charged with the duty of making all claims for reimbursement from the Federal Government. Since the original claims allowable were largely in the field of construction, this Bureau has taken on the additional job of making claims for right-of-way acquisition, preliminary engineering, on the job engineering and highway planning.

One result of this system is the accumulation in the construction office of many records concerning right-of-way acquisition and the other claims made, which do not concern the construction department. This office also handles the pre-qualification of contractors. Under the pre-qualification system, a contractor files an affidavit setting forth his financial condition, amount and type of equipment available to him and his experience in highway contracts. He is then assigned a certain amount in dollars of each particular type of work on which he may bid during the course of the year.

The abolishment of this practice was recommended in the report of the "Commission to Study State Government" of December, 1950. If the Board of Highway Advisors is reactivated, pre-qualification could be given immediate study.

Recently the Bureau of Right-of-Way Acquisition was established as an independent office. Prior to that time it had operated within the Bureau of Design. The function of the office is roughly this: When sufficient plans become available, negotiators attached to the district offices attempted to acquire the right-of-way needed by direct negotiation. If the local attempts fail, the Attorney General is called in and private law firms are engaged to commence condemnation proceedings necessary to acquire the land. These are supervised by an Assistant Attorney General who offices in the Bureau of Right-of-Way Acquisition. In 1957, the Legislature made available a quick taking law to prevent repetition of costly details which were not uncommon in condemnation proceedings. The law was declared constitutional in 1958, and testimony indicates that it is now used in most cases where litigation is required.

The Bureau was questioned concerning the programmed right-of-way acquisition and the actual acquisition. In 1957, scheduled right-of-way acquisition was \$35,701,000, of which \$8,181,990 was actually acquired. In 1958, \$39,812,000 was scheduled for acquisition and \$18,000,000 was actually acquired. This Department is not responsible for the programming of right-of-way acquisition. They cannot proceed to acquire right-of-way until certain preliminary plans become available.

It has not been the policy of the Division of Highways to claim Federal reimbursement for right-of-way acquired for the Primary Highway system. However, certain right-of-way acquired for Route 66 was claimed in May, 1956. In March of this year, these claims were substantially reduced by the Bureau of Public Roads. In one group of parcels the Department claimed \$332,444. This amount was reduced \$159,039 after their investigation. Another claim of \$294,425 was reduced \$81,379. The only explanation given by the Department for these reductions is that the investigation came after the settlements, turning up information that could not have been anticipated. Considering the size of the reductions, there was much that was not anticipated by the Bureau of Right-of-Way Acquisition.

The Bureau of Administrative Services of the Department of Public Works and Buildings handles the financial details including payments to contractors, engineers, and collections of accounts receivable. It was not the purpose of the committee to analyze the accounting methods employed by this office. The Department seems satisfied with their methods; however, Mr. Monnier of the Department of Public Roads felt that there was room for improvement.

An audit was made for the period of July 1, 1956, to June 30, 1958, by the accounting firm of Murphy, Turnbull and Jones. The following is an excerpt from their audit:

"It is our opinion that the activities and responsibilities of the Division have far outgrown its fiscal accounting methods and facilities. There is poor control over retained copies of vouchers, little coordination between the various subdivisions of the accounting activity, and no provision for orderly and automatic accumulation of totals and development of control totals or balances against which the work of the several subdivisions may be readily proved. The same general condition exists in the central records of the Garage Revolving Fund.

"It is our recommendation that an exhaustive professional survey of all fiscal and accounting functions of the Division be authorized, and that routines be devised and equipment provided as it may be needed to modernize the Division's fiscal and accounting processes, and to make them adequate to record and report on all activities. It is our present opinion that punch cards and the machines which process them should be considered as the basic medium, and that the accounting system should be so designed that the results of all transactions will be accumulated in a general or control ledger."

Mr. Monnier commented that his people often had difficulty in performing their auditing work because of this situation. However, it is interesting to note that the Federal Aid contracts are investigated and audited to some extent.

At the present time, there are no figures available on a regular basis for determining progress and expenditures of the Division of Highways. The Bureau keeps its records on a monthly basis. There would be no difficulty in preparing a financial statement on a quarterly basis, using the figures that are already available to the Department. These would include the balance left in the Road Fund and in the appropriation, and the amount of Federal Aid collected during the past quarter, the amount anticipated during the coming quarter, and other pertinent data concerning the finances of the Department. The compilation of a fiscal report would be much simplified with the use of these figures which had been already tabulated,

and the possibility of a two-year delay in an annual report would be minimized, since most of the work would have been accomplished.

We are not unmindful of the fact that the Illinois State Toll Highway Commission issues quarterly reports containing a statement by the Chairman, which is comparable to the Director; a report by the Executive Director, which is comparable to the Chief Highway Engineer; a list of the construction contracts awarded; a report on the progress of the construction program and the land acquisition program, printing in full the record of the land acquisition by parcels.

If this were done, the public could be kept up to date on the progress of the highway program. The Illinois State Toll Highway Commission is required to make a quarterly report for the protection of the bondholders and we believe that the taxpayers of Illinois are entitled to as much.

Another matter of primary importance concerns the inadequacy of State funds to meet the current and anticipated improvement needs of the State highway system. Considerable attention has been given to the huge increase in the Federal-Aid highway program initiated by the passage of the 1956 Federal-Aid Highway Act. As a result the general impression has prevailed that, financially, there is no cause for concern. This is not the case.

While the 1956 Federal-Aid Highway Act increased the amount of Federal funds available for use by the states on all Federal highway systems, it gave particular emphasis to the Interstate system, with only moderate increases in primary rural, urban, and secondary Federal highway programs. However, there are two important points in connection with the use of Federal funds which must be emphasized:

- (1) Federal funds are allocated for use on specifically designated highway systems, in accordance with formulas established by Federal law. They are not granted to the State outright, but are paid as a reimbursement for the *Federal share* of work accomplished. Federal funds must be matched with a prescribed amount of State or local funds.
- (2) There are approximately 5,000 miles of highways in the State system not a part of the Federal primary highway system which cannot be improved with Federal primary funds.

State revenue available for State highway purposes is not adequate to meet the improvement needs of the State highway system as revealed by the last comprehensive survey in 1957 in cooperation with the United States Bureau of Public Roads.

It is apparent that if the improvement needs of the State highway system are to be fully met additional State revenue will have to be found. However, it is not our recommendation that this General Assembly now attempt to meet that problem.

It is our recommendation that this General Assembly consider with extreme care all measures appropriating or increasing appropriation of funds from the Road Fund for purposes other than highway construction, maintenance, and operation and that no bill be enacted diverting road funds for non-highway purposes. In the past the record of this Legislature on this subject has been good and, in view of the situation outlined above, we should exert every effort to keep it so. It is also recommended that no measure be passed at this session which will reduce the revenue available for highway purposes.

## V

## CONCLUSION

We would be remiss in our duty if we did not report to the House that we are fast approaching the point where the funds available for construction would be devoted entirely to matching Federal-Aid appropriations. This reemphasizes the necessity of a watchdog for the Road Funds to see that they are not diverted by either the legislative branch or the executive branch of the government. If the funds available for construction are to be devoted for matching Federal-Aid appropriations, the maintenance presents a problem since the Federal Highway Act of 1956 requires the State to maintain the roads or the Federal Funds will be cut off.

On the other hand, the State of Illinois is faced with an alternative of claiming every dollar it can from the Federal Government to maintain the balances for matching funds and to meet the needs on the system of highways where Federal Primary Funds cannot be used. We trust, as a result of this review of the progress and financial commitments of the Division of Highways, that the following will be instituted:

1. That both the executive and legislative branch of the government will scrupulously avoid a diversion of the Road Fund to other purposes.

We think it appropriate to reiterate at this time what is written on page 35 of the Journal of the House of Representatives of the Sixty-ninth General Assembly:

"Whenever the toll revenues are insufficient, then first the Department of Public Works and Buildings and next the legislature will be subjected to pressure to subsidize the toll roads from the state revenue."

2. That the Division of Highways will pay some attention to the local needs and the use of primary roads as required by the laws enacted in the Seventieth General Assembly.

It is recommended that the Governor and the Director of the Department of Public Works and Buildings be furnished with a copy of this report to facilitate their consideration of the matters herein discussed.

Since five of the recommended bills are pending in the House, we respectfully request that the Chairman of the Committee on Roads and Bridges transmit this report to the House, and that it be printed in the journal for the information of the members who soon will consider said bills.

Respectfully submitted,

Subcommittee of House Committee on Roads and Bridges.

## HOUSE JOINT RESOLUTION NO. 46

WHEREAS, Recent decisions of the Federal courts and recent opinions and assertions from the United States Department of Justice have deprived states and persons of rights which said states and persons previously enjoyed, to regulate and control the use of water in those respective states and areas; and

WHEREAS, Said decisions and opinions are a part of a general pattern gradually developing into Federal supremacy over and usurpation of water which, if continued, will destroy individual and state's rights and substitute in lieu thereof an all powerful centralized government control over water; therefore, be it

Resolved, By the House of Representatives of the Seventy-first General Assembly of the State of Illinois, the Senate concurring herein, that the President and Congress of the United States and the Representatives of the State of Illinois in the Congress of the United States, be and they hereby are urged and requested to take all necessary action (1) to preserve the water rights of the individual and of the several states and to prevent Federal usurpation of those rights; (2) to initiate and support legislation which will reestablish and secure to individuals and to the states the rights taken from them by the Federal courts and the Department of Justice, and (3) in every way possible to reaffirm, renew, further and defend the concept that water rights are property rights and that these established rights to the use of water by state or an individual should not be taken away without due process of law and adequate compensation; be it further

Resolved, That certified copies of this resolution be transmitted by the Secretary of State to the President and Vice-President of the United States, to the Speaker of the House of Representatives of the Congress, to the Chairman of the United States Senate and House Committees of Interior and Insular Affairs, and to each of the Senators and Representatives from the State of Illinois.

WHEREAS, Fire safety in schools has been brought graphically before the people of Illinois due to the tragic Chicago parochial school fire last winter which took the lives of scores of children; and

*Resolved, By the House of Representatives of the Seventy-first General Assembly of the State of Illinois, that the State Fire Marshal is requested to invite representatives of industry, school districts and all other interested persons to assemble in Springfield sometime during August, 1959 for the purpose of thoroughly investigating and studying school fire hazards and the best course to follow in improving fire safety in schools through various fire protection devise systems and building design. WHEREAS, The fame of the House All-Stars has, like a moth to the flame, attracted a challenge from yet another team, namely the Third House, or as sometimes known, the Lobbyists at this Seventy-First General Assembly session; and

WHEREAS, Although the challenge is unworthy of the superior skill of the House All-Stars, it has been accepted and the game has been scheduled for Wednesday, June 17, at 8 p. m. at Lamphier Park, the scene of the House All-Stars earlier triumph over the House of Lords; therefore, be it

*Resolved, By the House of Representatives of the Seventy-first General Assembly of the State of Illinois*, that we extend in advance our sympathies to the Lobbyist Lumber Swingers whose defeat is a foregone conclusion; and be it further

*Resolved*, That should the Lobbyist team for some unlikely and completely unexpected reason luckily win the game, the Lobbyist may rest assured that no bills in which they have shown any interest will be passed by this House at this session.

If an elector possesses such a certificate valid on its face, if his name does not expressly appear to have been erased or withdrawn from the precinct list as corrected and revised as provided by Section 4-11 of this Article, if he makes an affidavit and attaches such certificate thereto, and if such affidavit is sworn to before a judge of election on suitable forms provided by the county clerk for that purpose, such elector shall be permitted to vote even though his duplicate registration card is not to be found in the precinct binder and even though his name is not to be found upon the printed or any other list. Such affidavit shall be in substantially the following form:

'I do solemnly swear that I am the same person to whom the attached certificate of registration was duly issued and mailed, that I still reside and have resided since the issuance thereof at the address appearing thereon in said precinct, that my registration at such address has not to my knowledge been cancelled, erased or withdrawn, and that I am a duly qualified voter from such address in every respect.

#### VETO

June 17, 1959.

*The Honorable, The Members of the House of Representatives, Seventy-first General Assembly:*

I return herewith, without my approval, House Bill No. 101, entitled, "An Act to add Section 7.1 to 'An Act in relation to State highways', approved June 24, 1921, as amended."

I veto and withhold my approval from this Bill for the following reason:

This Bill has a good purpose and would generally be without any objection. However, the Bill proposes to add a section to a statute which was repealed by Senate Bill No. 4, approved June 8, 1959. By adding a section to a repealed Act, this Bill is subject to the probable objection that it is incomplete legislation. This defect has been pointed out by the Attorney General in an opinion dated June 16 of this year.

For this reason, I veto and withhold my approval from House Bill No. 101.

Respectfully submitted,

WILLIAM G. STRATTON, *Governor*.

The foregoing message from the Governor, transmitting veto to House Bill No. 101, was read by the Clerk and ordered placed on file.

Your Joint Committee has held a series of meetings and has heard extensive testimony in support of and opposing all of the proposals for revision of said Article IX filed to date in both Houses.

Following such action, on June 15, 1959, your Joint Committee adopted by a majority vote the following resolution:

*Resolved*, By the special Joint Legislative Committee appointed pursuant to House Joint Resolution No. 9 that it is the consensus of a majority of the special Joint Legislative Committee that in view of wide divergence between various proposals, no acceptable proposed new Revenue Article can be agreed upon which will meet the approval of two-thirds ( $\frac{2}{3}$ ) of the members of each House of the General Assembly, and that in the alternative it is hereby recommended that a joint legislative interim commission be created for the purpose of studying the problems involved and recommending to the 72nd General Assembly a form of Revenue Article for submission to the electorate in the November, 1962 election.

Your Joint Legislative Committee hereby requests that it be discharged.

Respectfully submitted,

Every owner of a motor vehicle of the second division who elects to pay on a mileage weight tax basis and who operates the vehicles within this state, shall file with the Secretary of State a bond in the amount of five hundred dollars (\$500.00) on a form to be approved by and with a surety or sureties satisfactory to the Secretary of State, conditioned upon said applicant's paying to the State of Illinois, all monies becoming due by reason of his operation of the second division motor vehicles in this state, together with all penalties and interest thereon.

5. In assigning number plates to any motor vehicle of the second division for which election of a mileage weight tax has been made by its owner, the Secretary of State shall assign plates which have a color combination which is readily distinguishable from the number plates assigned, or to be assigned, to motor vehicles of the second division for which the owner has elected to pay the flat weight tax imposed by this Section.

[(h)] (i) A registration fee of \$2.00 per annum shall be paid in the following cases:

(1) Vehicles owned and operated by the State of Illinois, or by any county, township or municipal corporation.

(2) Vehicles owned and operated as a school bus by any school district, or religious, eleemosynary or denominational institution. Vehicles, owned or leased, and operated in a high school driver training program by any school district, or school operated by a religious institution.

(3) Vehicles owned and operated by any religious denomination for the transportation of its members for religious purposes.

(4) *Vehicles owned by the State of Illinois, or by any county, township, city, village or incorporated town or any group of six or more persons designed for use in extinguishing fires.*

[(i)] (j) Vehicles of the second division having a corn sheller, a well driller, hay press, clover huller, feed mixer and unloader, or other farm machinery permanently mounted thereon and used solely for transporting the same shall be registered upon the filing of a proper application and the payment of a registration fee of \$5.00 per annum. This registration fee of \$5.00 shall be paid in full and shall not be reduced even though such registration is made during the second half of the calendar year.

[(j)] (k) Vehicles having permanently mounted equipment thereon used exclusively by the owner for the transporting of such permanently mounted equipment and provided such vehicle is not used for hire shall register such vehicles upon the filing of a proper application and the payment of a registration fee of \$5.00 per annum. This registration fee of \$5.00 shall be paid in full and shall not be reduced even though such registration is made during the second half of the calendar year.

[(k)] (l) Dealers, manufacturers and transporters registered under this Act may obtain registration plates, for use as herein provided by law, at the following rates: initial set of dealer's plates \$20.00, duplicate plates \$3.00; initial set of "in-transit" plates \$20.00, duplicate plates \$3.00; initial set of manufacturer's plates, \$20.00, duplicate plates \$3.00.

[(l)] (m) In the event that any owner of a vehicle desires to transfer the registration thereof to another vehicle requiring a higher registration fee, then such

owner must pay an additional fee equal to the difference between the registration fee paid for the registration and the registration fee required for the vehicle with greater horse power or with a higher gross load classification, as the case may be, and in addition to such transfer fee shall pay a reclassification fee of \$2.00.

[(m)] (n) The annual registration fee of motor vehicles, except mileage weight registration fees and except vehicles registered pursuant to paragraphs [(h)] (i), [(i)] (j), [(j)] (k) [and (k)] and (l) of this Section shall be reduced by 50% in the event that the application for the registration of such vehicles is filed with the Secretary of State after July 1 of any calendar year. This 50% reduction in registration fees shall not apply to motor vehicles of the second division if such motor vehicles were registered in the prior calendar year.

[(n)] (o) Upon filing in the office of the Secretary of State an affidavit to the effect that an original number plate shall be furnished upon payment of a fee of \$1.00 for each duplicate plate for a motor bicycle, \$2.00 for each duplicate plate for a first division vehicle, and \$3.00 for each duplicate plate for a second division vehicle. The Secretary of State may, in his discretion, assign a new number plate or plates in lieu of a duplicate of the plate or plates so lost, stolen or destroyed, but such assignment of a new plate or plates shall not affect the right of the owner to secure a reassignment of his original registration number in the manner provided in this Act."
